Faruk Abdullah

Software Engineer | Full Stack | Remote | ASP.NET Core | Win-Form | ASPX | MVC | MS SQL | MySQL | Angular | Micro-Service | JavaScript, jQuery | Angular | SVN, TFS, Git | Azure | AWS
Kuala Lumpur City, Federal Territory of Kuala Lumpur, Malaysia

Summary

I'm a Full Stack Engineer with 5+ years of hands-on experience in software development. My primary focus is on the functionality of the application, ensuring that it is robust, reliable, and scalable, and that it performs well under heavy traffic loads and my passion lies in creating user-friendly and intuitive interfaces that delight users.

Collaboration is key in my work, and as an enthusiastic problem solver, I enjoy working with cross-functional teams to deliver excellent results. I am well-versed in Agile development methodologies and understand the importance of effective communication with clients and stakeholders to ensure their needs are met.

I am committed to staying up-to-date with the latest trends and technologies in the industry. I constantly seek out new challenges to enhance my skillset, which is essential to propel business growth and achieve success.

Here are a short glimpse of my skillset:
Languages: C#, SQL, HTML, XML, UML JavaScript, PHP
Frameworks: ASPX WebForm, MVC, WebAPI
ORM: Entity Framework
Script: JavaScript, jQuery, ES6, TypeScript, CSS
Front End UI Libraries: Bootstrap
Frontend Design: HTML, CSS, SCSS, Bootstrap, PrimeFlex
Version Control: Git, GitHub, SVN, TFS
Web Service: REST, SOAP API, WCF
SDLC: Water-Fall, Agile
Design Principle: FDD
Organizational: Leadership, Team Management
Cloud: Azure app service | AWS Amplify, S3, EC2

Experience

Global Software Architects
Senior Software Engineer
June 2024 - October 2024 (5 months)
Dhaka, Bangladesh

Project: Event Management System

Role in Company: Understanding the needs of event organizers and translating them into software features.

Key Responsibilities:
1. Maintenance: Updating the software to improve performance and add new features as needed.
2. Testing: Ensuring the software is bug-free and performs well under various conditions.
3. Integration: Connecting the software with payment gateways, email systems, calendars, and third-party tools.
4. Development: Writing code to build the application with user-friendly interfaces and reliable functionality.
5. System Design: Designing modules for registration, ticketing, scheduling, venue management, and attendee communication.

Nitol Niloy Group
Senior Executive
August 2023 - May 2024 (10 months)
Dhaka, Bangladesh

Project: Spare Parts Inventory System

Role in Company: Understanding the inventory needs of the business and defining software
features accordingly.

Key Responsibilities:
1. System Design: Creating the architecture and data flow for efficient inventory tracking.
2. Development: Writing clean and efficient code for core modules like stock tracking, order management, supplier data, and reporting.
3. Testing & Debugging: Identifying and fixing bugs to ensure reliable and accurate performance.

4. Maintenance & Updates: Regularly updating the system to meet evolving business needs and improve performance.

5. User Support: Providing technical support and troubleshooting for end-users.

Royal Green Ltd.
Software Engineer
August 2018 - July 2023 (5 years)
Dhaka, Bangladesh

Project: Integrated Cloud-based ISP Billing System

Role in Company: Responsible for designing scalable systems, choosing appropriate technologies, and ensuring long-term software health.

Key Responsibilities:

1. Architect systems and software solutions.

2. Ensure performance, security, and maintainability.

3. Mentor developers and enforce coding standards.

4. Work closely with product, DevOps, and QA teams.

Akash TrackMe
Computer Programmer
April 2015 - July 2018 (3 years 4 months)
Dhaka, Bangladesh

Project: Vehicle Tracking System

Role in Company: Focuses on implementing and maintaining features based on specifications from engineering leads.

Key Responsibilities:

1. Write and test code for applications.

2. Fix bugs and optimize existing code.

3. Collaborate with designers and QA for feature delivery.

4. Participate in code reviews and sprint planning.

Education

University of Malaya
Master of Software Engineering (Software Technology), Software Engineering · (March 2025 - October 2026)

Pabna University of Science and Technology

Master, Computer Science · (January 2020 - December 2020)

Jahangirnagar University

PGDIT, Information Technology · (2017 - 2018)
